# Attentiveness

- Attentiveness is measured by whether or not your workshop screen is active; I can monitor attentiveness live, during the workshop.

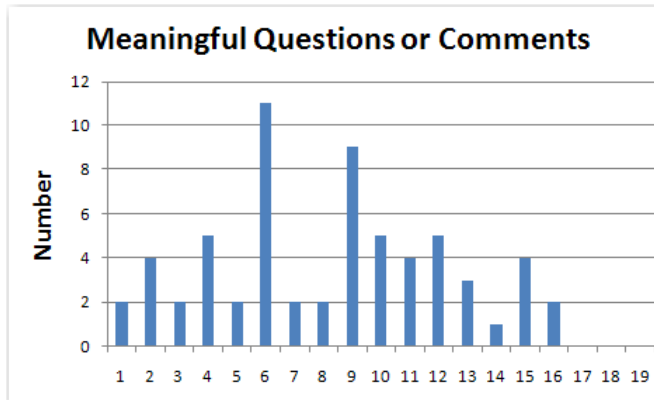

# Attentiveness

- Attentiveness is reported for each attendee on a scale of 1-100. Your workshop screen should be active at least 65% of the time.

## Meaningful Questions or Comments

- We tally the number of meaningful questions or comments each attendee contributes. You must contribute at least one.
